Additional Information

Course Structure:
The course structure provides an overview of the requirements to complete the qualification. This includes the total credits and subjects required, the elective options including number of required core subjects (9) and maximum number of electives (3) that can be selected to meet the 12 subject total requirement as well as the recommended study plan.

Assessment Matrix:
It is important to plan your time and prepare to submit your assessments on time to avoid academic penalty. We recommend you print out and use the assessment matrix relevant to the elective subject groups you choose to study to help plan your time. Note that these are subject to change, so it is always best to use this as a guide and check in your blackboard page at the start of each trimester.

Reading list:
Please see the reading list for the key material to support your study. Note that these are subject to change, so it is always best to use this as a guide and check your subject outline in your blackboard page at the start of each trimester to check for changes.

Exam Attendance:
Students are required to attend Final exams at the campus that they are enrolled at for their course (Course home campus). Students that have enrolled with a course home campus of Pyrmont must attend exams at the Pyrmont campus, students that have enrolled with a course home campus of Brisbane must attend exams at the Brisbane campus. This means that when selecting a subject with an online delivery mode that you will still be required to attend the course home campus for the final exam should the subject have one.

Only students who are enrolled at the online campus as their course home campus will have the option to arrange to sit an invigilated remote exam or may instead opt to attend one of our health campuses at Pyrmont, Brisbane or Fitzroy for their exam if preferred.

Students are responsible for identifying which subjects in the course contain final exams by checking the subject outline at the start of each trimester and ensuring they can meet exam attendance requirements. All exams are in Exam week (week 12) and students are responsible for ensuring they are available for this compulsory attendance period. Requests for deferring exams for reasons other than extenuating circumstances according to the assessment policy will not be considered.

Your Academic and Success Coach Team:
Your Program Director is Ashley Hillsley: ahillsley@laureate.net.au
For subject specific enquiries, please reach out to your subject lecturer (you will find their contact details in the blackboard page). For other academic enquiries, please contact one of our academic team supporting the program:
Dr Dhiyva Rajasekaran: drajasekaran@laureate.net.au (Senior Lecturer)
Dr Noosha Ehya: noosha.ehya@laureate.edu.au (Senior Lecturer)
Dr Vinicius Cruzat: vinicius.cruzat@laureate.edu.au (Senior Lecturer)
Jackob Kagize: jackob.kagize@laureate.edu.au M.D. (Lecturer)

Victoria King: vking@laureate.net.au is the dedicated Success coach for the students undertaking the Diploma of Health Science.

A Success Coach partners with you from week one to graduation, to empower you to progress through your course, get to know and use your strengths for study and beyond, and gear up for your career.
